90 PATTISON STREET
EVANS CITY, PA 16033

As one of the leading custom chrome platers in the country, we understand the importance of listening to your customers and working diligently to exceed their expectations on every job. Core Compliance Group shares this business philosophy and has consistently provided us with an exceptional level of service on all of our safety and environmental needs. With their guidance we have greatly enhanced safety programs for our employees, attained and maintained compliance with OSHA and environmental regulations, and successfully divested a Brownfields site formerly listed within the Pennsylvania Land Recycling (Act 2) Program. We are extremely satisfied with their performance and dedication and will rely on their expertise to keep our employees safe and our operations compliant for years to come.
